

NAME / Tomato+ - Domestic vegetable garden

DESIGN / CRS Boffi - Tomato+/2017

INSPIRATION / A small Made in Italy domestic vegetable garden, independent from seasons and weather.
Tomato+ is the solution to have fresh vegetables, spices and herbs whenever you want and to enjoy flavors and scents of the Mediterranean cuisine in your own home.
Eating carefully, choosing healthy foods, means to live well.
Tomato+ offers daily home-grown vegetables with a high content of vitamins and minerals.

DESCRIPTION / How it works: Seeds pods - Meant to be used by anyone, the pods contain natural substrates, high-quality seeds, no GMO's, no chemical additives, no pesticides. Vacuum packed in controlled environments, their freshness and germination characteristics remain unchanged for 12 months. The pods are made of biodegradable and compostable materials.
Can be purchased on-line or from smartphones through the app.
Technology – a unit conceived to optimise natural growth conditions with support of a dedicated software that parametrises the three essential elements of nature: light, humidity and temperature.
The LEDs faithfully and naturally reproduce the daily light cycle. Each light frequency is carefully calibrated for the healthy growth of the vegetables.
Thanks to the software it is possible to choose from 30 types of vegetables and define the configuration of your home garden, differentiating it, from buds to basil or lettuce plants.

TECHNICAL FEATURES/ Structure in stainless steel with internal structure in non-toxic plastic.
Frame door in AISI 316 stainless steel with Boffi Tline handle H. 1120.
Laminated glass with conductive film in liquid crystal polymer – 80V voltage.
5 LED branches in Blu, Deep Blu, Green, Far Red, Red and other coloration with power and time regulators, controlled automatically based on the selected crop.
Internal voltage 24V – voltage 110/240V – average electricity consumption 80Wh
Environmental requirements: Working temperature from +16° to +32°. Relative humidity from 20% to 95%. Use in a closed environment, not exposed to atmospheric agents
Unit dimensions H. 2000 (without feet), L.600, P. 620 (including handle).
4 floors for pod trays in non-toxic plastic.
Software available for Apple and Android devices – Bluetooth.
2 days memory without electricity.
CE e UL certifications – for a complete international distribution.
