

**NAME /** AH01 – outdoor kitchen

**DESIGN /** Alessandro Andreucci – Christian Hoisl / 2018

**INSPIRATION /** A kitchen plate for a light and healthy cooking methodology that does not require any condiments and allows preparation of different foods while preserving their flavours that may typically conflict i.e. Chicken after sausages or courgettes after meat, crepes and caramelised pineapple after meat.  
The kitchen offers quick and easy cleaning and maintenance. The plate has an inclination towards the front side that allows both flow and collection of liquids into a removable front pan, easy to clean after each cooking session.  
Cooking without condiments ensures a smokeless environment. Odour levels are very low and the cooking smell quickly disappears.

**DESCRIPTION /** Kitchen mono-blocks for outdoor use with tubular structure in AISI 316 stainless steel. The BBQ cooking block features a lid in Paperstone® Slate that can be placed on the lower grid shelf of the grill.  
The cooking area is fitted with professional burners and FryTop plate in AISI 304 stainless steel.  
Compatible with standard BBQ gas cylinders (5L.).  
Additional washing block with tap.  
Monobloc with countertop in Paperstone® Slate, with equipped drawer in Paperstone®.

**TECHNICAL FEATURES /** Mono-block in AISI316 stainless steel composed of cooking zone, washing zone, worktop and drawer in Paperstone® Slate.  
Accessories: protecting louvres for cooking zone; unit for cylinder covering; syphon cover (island version), protective waterproof outdoor cover for each kitchen element.

h.860 W.600 d.600	Block with drawer– worktop in Paperstone®
h.860 W. 600 d.600	Stainless steel corner joining block

"The concept comes from the desire to achieve a flexible and minimally invasive cooking element when not in use, extremely functional and professional when in use. We introduced a highly mechanical lid with assisted opening/closing system that showcases and protects the operative areas of cooking and washing. Consistent with the company's philosophy aimed at wellness and the principles of healthy living, AH1 allows to cook different types of food without mixing flavours on a professional steel plate, all this without use of condiments. It does not produce smoke and its cooking area can be quickly and easily cleaned." A.Andreucci - C.Hoisl
