

**NAME /** Open - double shelf

**DESIGN /** Piero Lissoni / 2018

**INSPIRATION /** Originally conceived with one shelf to cover the hood, now Open turns into a double shelf with its characteristic tie rods suspended from the ceiling. The system is designed specifically for kitchen islands and increases its functionality by offering twice the space and an integrated light bar. The final result yields vibrant reflections of the industrial wired glass.

**DESCRIPTION /** A double shelf version is presented to complement the hood and single shelf systems. It can be positioned autonomously above the kitchen island as a supporting element for different tools and items and it is equipped with a central LED light bar that is also a ladle holder. Frame and ceiling-fixed tie-rods in brushed stainless steel and shelves in industrial wired glass

**TECHNICAL FEATURES /** Island shelves with tubular stainless steel structure and wired glass.  
Modules: minimum 900 - max. 1200 mm.  
Height of rods: min. 800 - max. 1500 mm.  
LED bar covered in stainless steel, same dimensions of shelves, temperature 3000°K.
